PREFACE

CHAPTER	1	SET THEORY	1
	1.1	SETS	1
	1.1.1	Basics of Sets.....	1
	1.1.2	Operations on Sets.....	4
	1.1.3	Relations.....	10
	1.1.4	Functions.....	18
	1.1.5	Algebra of Sets.....	22
	1.2	THE REAL NUMBER SET.....	29
	1.2.1	Introduction.....	29
	1.2.2	The real number Set.....	38
	1.2.3	The extended real number Set.....	50
	1.2.4	Some useful tools.....	53
	1.2.5	Representation of a real number.....	59
	1.3	THE COMPLEX NUMBER SET	62
	1.3.1	Introduction.....	62
	1.3.2	Algebraic form of the complex numbers.....	64
	1.3.3	Trigonometric form of the complex numbers.....	66
CHAPTER	2	SYSTEMS OF LINEAR EQUATIONS.....	71
	2.1	MATRICES.....	71
	2.1.1	Vector spaces.....	71
	2.1.2	Basics of matrices.....	78
	2.1.3	Operations on matrices.....	82
	2.2	DETERMINANTS.....	89
	2.2.1	Combinatorial analysis.....	89
	2.2.2	Basics of determinants.....	95
	2.2.3	Properties of determinants.....	100
	2.2.4	Minors.....	107
	2.3	SYSTEMS OF LINEAR EQUATIONS.....	123
	2.3.1	Introduction.....	123
	2.3.2	Solution of the problem.....	126

CONTENTS

	2.3.3	Elimination procedure of Gauss.....	134
	2.4	THE EIGENVALUE PROBLEM.....	139
	2.4.1	Eigenvalues and eigenvectors.....	139
CHAPTER	3	BASIC TOPOLOGY.....	144
	3.1	METRIC SPACES.....	144
	3.1.1	Introduction.....	144
	3.1.2	The metric space.....	147
	3.1.3	Open set. Neighborhood of a point.....	149
	3.1.4	Accumulation point. Closed set.....	152
	3.1.5	Compact set.....	157
	3.2	The metric space \mathbb{R}^n	159
	3.2.1	Case $n = 1$	159
	3.2.2	Case $n > 1$	164
CHAPTER	4	NUMERICAL SEQUENCES AND SERIES...	171
	4.1	SEQUENCES OF REAL NUMBERS.....	171
	4.1.1	Regular sequences.....	171
	4.1.2	Operations on limits.....	187
	4.1.3	Upper and lower limit.....	201
	4.1.4	Cauchy's sequences.....	209
	4.1.5	The number e	211
	4.2	SERIES OF REAL NUMBERS.....	213
	4.2.1	Introduction.....	213
	4.2.2	Series of nonnegative terms.....	219
	4.2.3	Absolute convergence.....	223
	4.3	SEQUENCES OF K-TUPLES OF REAL NUMBERS...	224
	4.3.1	Convergent sequences.....	224
	4.3.2	Subsequences.....	229
CHAPTER	5	LIMITS AND CONTINUITY.....	233
	5.1	LIMITS OF REAL FUNCTIONS OF ONE REAL VARIABLE.....	233
	5.1.1	Introduction.....	233
	5.1.2	Limits.....	247
	5.1.3	Operations on limits.....	283
	5.1.4	Upper and lower limits.....	296

CONTENTS

	5.1.5	Other properties of limits.....	312
5.2		LIMITS OF REAL FUNCTIONS OF SEVERAL REAL VARIABLES.....	326
	5.2.1	Introduction.....	326
	5.2.2	Limits.....	333
5.3		CONTINUITY OF REAL FUNCTIONS OF ONE REAL VARIABLE.....	345
	5.3.1	Continuous functions.....	345
	5.3.2	Uniform continuity.....	357
5.4		CONTINUITY OF REAL FUNCTIONS OF SEVERAL REAL VARIABLES.....	360
	5.4.1	Continuous functions.....	360
CHAPTER 6		DIFFERENTIATION.....	370
	6.1	DIFFERENTIATION OF REAL FUNCTIONS OF ONE REAL VARIABLE.....	370
	6.1.1	Derivative of a real function.....	370
	6.1.2	Mean value theorems.....	395
	6.1.3	Local extrema.....	407
	6.1.4	Taylor's formula.....	418
	6.1.5	L'Hospital's rule.....	430
	6.2	DIFFERENTIATION OF REAL FUNCTIONS OF SEVERAL REAL VARIABLES.....	437
	6.2.1	Partial derivative of a real function.....	437
	6.2.2	Differentiable functions.....	448
	6.2.3	Derivative of the composite function...	458
	6.2.4	Directional derivative.....	466
	6.2.5	Local extrema.....	474
	6.2.6	Implicit functions.....	489
CHAPTER 7		INTEGRATION.....	498
	7.1	DEFINITE INTEGRAL.....	498
	7.1.1	Definition of definite integral.....	498
	7.1.2	Properties of definite integral.....	510
	7.1.3	Improper integral.....	529
	7.2	CURVILINEAR INTEGRAL.....	535
	7.2.1	Curves of \mathbb{R}^n	535
	7.2.2	Regular curves.....	540
	7.2.3	Curvilinear integral.....	567

CONTENTS

	7.2.4	Differential forms.....	572
7.3		MULTIPLE INTEGRAL.....	579
	7.3.1	Measurable sets of \mathbb{R}^n	579
	7.3.2	Double integral.....	587
	7.3.3	Main instruments.....	597
	7.3.4	Triple integral.....	630
7.4		SURFACE INTEGRAL.....	632
	7.4.1	Regular surfaces.....	632
	7.4.2	Surface integral.....	650
CHAPTER 8		SEQUENCES AND SERIES OF FUNCTIONS	665
	8.1	SEQUENCES OF FUNCTIONS.....	665
	8.1.1	Uniform convergence.....	665
	8.2	SERIES OF FUNCTIONS.....	675
	8.2.1	Uniform convergence.....	675
	8.2.2	Power series.....	685
	8.2.3	Fourier series.....	699
CHAPTER 9		CALCULUS BY ELEMENTARY FUNCTIONS	701
	9.1	ELEMENTARY FUNCTIONS.....	701
	9.1.1	Power function with integer exponent.	701
	9.1.2	n -th Root function ($n \in \mathbb{N}$).....	708
	9.1.3	Exponential function.....	712
	9.1.4	Logarithm function.....	719
	9.1.5	Power function with non-integer real exponent.....	724
	9.1.6	Trigonometric functions.....	729
	9.1.7	Inverse trigonometric functions.....	738
	9.1.8	Hyperbolic functions.....	743
	9.2	CALCULUS.....	748
	9.2.1	Limits.....	748
	9.2.2	Ordinary derivatives.....	762
	9.2.3	Partial derivatives.....	780
	9.2.4	Definite integrals.....	784
	9.2.5	Multiple integrals.....	799
	9.2.6	Curvilinear integrals.....	809
	9.2.7	Surface integrals.....	810

CHAPTER 10	ORDINARY DIFFERENTIAL EQUATIONS	814
10.1	FIRST ORDER DIFFERENTIAL EQUATIONS.....	814
10.1.1	Introduction.....	814
10.1.2	Linear differential equations.....	817
10.2	DIFFERENTIAL EQUATIONS OF ORDER $n > 1$..	827
10.2.1	Introduction.....	827
10.2.2	Linear differential equations	828
10.2.3	The case of constant coefficients.....	846
10.2.4	Examples.....	857
BIBLIOGRAPHY.....		863
INDEX.....		865
