

# *CONTENTS*

## PREFACE

CHAPTER	1	SET THEORY .....	1
	1.1	SETS .....	1
	1.1.1	Basics of Sets.....	1
	1.1.2	Operations on Sets.....	3
	1.1.3	Relations.....	8
	1.1.4	Functions.....	13
	1.1.5	Algebra of Sets.....	18
	1.2	THE SET OF REAL NUMBERS.....	25
	1.2.1	Natural Numbers.....	25
	1.2.2	Integer Numbers.....	27
	1.2.3	Rational Numbers.....	36
	1.2.4	Real Numbers.....	41
	1.2.5	Representation of a Real Number .....	57
	1.2.6	Extended Set of Real Numbers .....	59
	1.2.7	Some useful tools.....	62
	1.3	THE SET OF COMPLEX NUMBERS .....	67
	1.3.1	Introduction.....	67
	1.3.2	Algebraic form.....	69
	1.3.3	Trigonometric form.....	70
CHAPTER	2	SYSTEMS OF LINEAR EQUATIONS.....	75
	2.1	MATRICES.....	75
	2.1.1	Vector spaces.....	75
	2.1.2	Basics of matrices.....	81
	2.1.3	Operations on matrices.....	84

	2.2 DETERMINANTS.....	90
	2.2.1 Combinatorial analysis.....	90
	2.2.2 Basics of determinants.....	95
	2.2.3 Properties of determinants.....	99
	2.2.4 Minors.....	107
	2.3 SYSTEMS OF LINEAR EQUATIONS.....	121
	2.3.1 Introduction.....	122
	2.3.2 Solution of the problem.....	125
	2.3.3 Elimination procedure of Gauss.....	132
	2.4 THE EIGENVALUE PROBLEM.....	137
	2.4.1 Eigenvalues and eigenvectors.....	137
CHAPTER 3	BASIC TOPOLOGY.....	141
	3.1 METRIC SPACES.....	141
	3.1.1 Introduction.....	141
	3.1.2 The metric space.....	143
	3.1.3 Open set. Neighborhood of a point.....	145
	3.1.4 Accumulation point. Closed set.....	148
	3.1.5 Compact set.....	152
	3.2 The metric space $\mathbb{R}^n$ .....	154
	3.2.1 Case $n = 1$ .....	154
	3.2.2 Case $n > 1$ .....	159
CHAPTER 4	NUMERICAL SEQUENCES AND SERIES	165
	4.1 SEQUENCES OF REAL NUMBERS.....	165
	4.1.1 Regular sequences.....	165
	4.1.2 Operations on limits.....	178
	4.1.3 Upper and lower limit.....	191
	4.1.4 Cauchy's sequences.....	197
	4.1.5 The number $e$ .....	199
	4.2 SERIES OF REAL NUMBERS.....	201

	4.2.1	Introduction.....	201
	4.2.2	Series of nonnegative terms.....	206
	4.2.3	Absolute convergence.....	210
	4.3	SEQUENCES OF K-TUPLES OF REAL NUMBERS...	210
	4.3.1	Convergent sequences.....	210
	4.3.2	Subsequences.....	215
CHAPTER	5	LIMITS AND CONTINUITY.....	218
	5.1	LIMITS OF REAL FUNCTIONS OF ONE REAL VARIABLE.....	218
	5.1.1	Introduction.....	218
	5.1.2	Limits.....	229
	5.1.3	Operations on limits.....	259
	5.1.4	Upper and lower limits.....	270
	5.1.5	Other properties of limits.....	283
	5.2	LIMITS OF REAL FUNCTIONS OF SEVERAL REAL VARIABLES.....	295
	5.2.1	Introduction.....	295
	5.2.2	Limits.....	300
	5.3	CONTINUITY OF REAL FUNCTIONS OF ONE REAL VARIABLE.....	310
	5.3.1	Continuous functions.....	310
	5.3.2	Uniform continuity.....	320
	5.4	CONTINUITY OF REAL FUNCTIONS OF SEVERAL REAL VARIABLES.....	322
	5.4.1	Continuous functions.....	322
CHAPTER	6	DIFFERENTIATION.....	331
	6.1	DIFFERENTIATION OF REAL FUNCTIONS OF ONE REAL VARIABLE.....	331
	6.1.1	Derivative of a real function.....	331

## CONTENTS

	6.1.2	Mean value theorems.....	351
	6.1.3	Local extrema.....	361
	6.1.4	Taylor's formula.....	369
	6.1.5	L'Hospital's rule.....	380
6.2		DIFFERENTIATION OF REAL FUNCTIONS OF SEVERAL REAL VARIABLES.....	385
	6.2.1	Partial derivative of a real function.....	386
	6.2.2	Differentiable functions.....	394
	6.2.3	Derivative of the composite function...	401
	6.2.4	Directional derivative.....	408
	6.2.5	Local extrema.....	414
	6.2.6	Implicit functions.....	426
CHAPTER 7		INTEGRATION.....	434
	7.1	DEFINITE INTEGRAL.....	434
	7.1.1	Definition of definite integral.....	434
	7.1.2	Properties of definite integral.....	445
	7.1.3	Improper integral.....	460
	7.2	CURVILINEAR INTEGRAL.....	464
	7.2.1	Curves of $\mathbb{R}^n$ .....	465
	7.2.2	Regular curves.....	469
	7.2.3	Curvilinear integral.....	491
	7.2.4	Differential forms.....	494
	7.3	MULTIPLE INTEGRAL.....	500
	7.3.1	Measurable sets of $\mathbb{R}^n$ .....	501
	7.3.2	Double integral.....	507
	7.3.3	Main instruments.....	516
	7.3.4	Triple integral.....	543
	7.4	SURFACE INTEGRAL.....	545
	7.4.1	Regular surfaces.....	545
	7.4.2	Surface integral.....	560

CHAPTER 8	SEQUENCES AND SERIES OF FUNCTIONS	572
8.1	SEQUENCES OF FUNCTIONS.....	572
8.1.1	Uniform convergence.....	572
8.2	SERIES OF FUNCTIONS.....	580
8.2.1	Uniform convergence.....	580
8.2.2	Power series.....	589
8.2.3	Fourier series.....	600
CHAPTER 9	CALCULUS BY ELEMENTARY FUNCTIONS	602
9.1	ELEMENTARY FUNCTIONS.....	602
9.1.1	Power function with integer exponent.	602
9.1.2	$n$ -th Root function ( $n \in \mathbb{N}$ ).....	609
9.1.3	Exponential function.....	612
9.1.4	Logarithm function.....	618
9.1.5	Power function with non-integer real exponent.....	622
9.1.6	Trigonometric functions.....	628
9.1.7	Inverse trigonometric functions.....	636
9.1.8	Hyperbolic functions.....	641
9.2	CALCULUS.....	645
9.2.1	Limits.....	645
9.2.2	Ordinary derivatives.....	659
9.2.3	Partial derivatives.....	679
9.2.4	Definite integrals.....	683
9.2.5	Multiple integrals.....	698
9.2.6	Curvilinear integrals.....	708
9.2.7	Surface integrals.....	710
CHAPTER 10	ORDINARY DIFFERENTIAL EQUATIONS	713

*CONTENTS*

10.1	FIRST ORDER DIFFERENTIAL EQUATIONS.....	713
10.1.1	Introduction.....	713
10.1.2	Linear differential equations.....	715
10.2	DIFFERENTIAL EQUATIONS OF ORDER $n > 1$ ..	724
10.2.1	Introduction.....	724
10.2.2	Linear differential equations .....	725
10.2.3	The case of constant coefficients.....	739
10.2.4	Examples.....	749
